

POPULATION : MISSOURI

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Missouri gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of the three cities of more than 50,000.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Missouri, 2,387,835, or 72.5 per cent, are native whites of native parentage; 518,201, or 15.8 per cent, are native whites of foreign or mixed parentage; 228,896, or 7 per cent, are foreign-born whites; and 157,452, or 4.8 per cent, are negroes. The corresponding percentages in 1900 were 71, 16.9, 6.9, and 5.2, respectively, the comparison indicating only slight changes in the composition of the population during the decade. In 99 counties the percentage of foreign-born whites is less than 5, and in only 3—including St. Louis city, a subdivision of the state coordinate with the 114 counties—does it exceed 10, the maximum percentage, 18.3, being that for St. Louis city. The percentage of native whites of foreign or mixed parentage ranges generally higher, exceeding 10 in 31 counties. (See maps on page 37.)

Of the urban population, 55 per cent are native whites of native parentage; of the rural, 85.5 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 25.1 and 8.8 per cent, respectively. The percentage of foreign-born whites is 12.4 in the urban population and 2.9 in the rural; the percentage of negroes is 7.5 in the urban and 2.8 in the rural.

Sex (Table 2).—In the total population of the state there are 1,687,813 males and 1,605,522 females, or 105.1 males to 100 females. In 1900 the ratio was 105.6 to 100. The number of males to 100 females among native whites is 103; among foreign-born whites, 135.9. It is 101.3 in the urban population and 108 in the rural.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—72.6 per cent were born in Missouri and 27.4 per cent outside the state; of the native white population, 27.3 per cent were born outside the state, and of the native negro, 30 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

POPULATION—MISSOURI.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Missouri, persons born in Germany represent 38.5 per cent; Ireland, 10.2; Russia, 9.3; Austria, 7.1; England, 6; Italy, 5.7; Hungary, 5; Canada, 3.4; Switzerland, 2.7; Sweden, 2.5; Scotland, 1.6; all other countries, 7.8. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 49.2 per cent; Ireland, 13.2; England, 6.5; Russia, 4.6; Austria, 4; Canada, 3.1; Italy, 2.8; Switzerland, 2.3; Hungary, 2; Sweden, 1.8; Scotland, 1.7; France, 1.5.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 973,062, representing 29.5 per cent of the population. Of such males, 64.8 per cent are native whites of native parentage, 17.2 per cent native whites of foreign or mixed parentage, 12.5 per cent foreign-born whites, and 5.4 per cent negroes. Of the 121,404 foreign-born white males of voting age, 65,612, or 54 per cent, are naturalized. Males of militia age—18 to 44—number 721,166.

Age (Tables 7, 8, and 13).—Of the total population, 10.9 per cent are under 5 years of age, 20.1 per cent from 5 to 14 years, inclusive, 19.8 per cent from 15 to 24, 29.2 per cent from 25 to 44, and 19.7 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 4.2 per cent of this class being under 15 years of age, while 84.9 per cent are 25 years of age and over. Of the native whites of native parentage, only 43.2 per cent are 25 and over; of native whites of foreign or mixed parentage, 57.1 per cent; of negroes, 54.6 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 34.3 per cent are from 25 to 44 years of age, inclusive, and of the rural, 25.3 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 993,998, of whom 646,866, or 65.1 per cent, attended school. In addition to these, 7,640 children under 6 and 11,466 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 65.4; for girls, 64.8. For children from 6 to 14 years, inclusive, the percentage attending school was 85.2. The percentage for children of this age among native whites of native parentage was 85.5; among native whites of foreign or mixed parentage, 86.7; among foreign-born whites, 80.7; and among negroes, 75.9. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance for the ages from 6 to 14, but for persons 15 to 20 years the percentage was 26.2 in the urban population and 41.9 in the rural.

Illiteracy (Table 10).—There are 111,116 illiterates in the state, representing 4.3 per cent of the total population 10 years of age and over. In 1900 the percentage of illiteracy was 6.4. It is 2.9 among

native whites, 10.1 among foreign-born whites, and 17.4 among negroes.

For all classes combined, the percentage of illiteracy is 3.3 in the urban population and 5.1 in the rural, the rural percentage being higher than the urban for each class separately except the foreign-born whites, most of whom arrive in this country when past the school age. For them the percentage is nearly the same in rural as in urban population.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 1.5. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 37.2 per cent of the males are single and 28 per cent of the females. The percentage married is 56.9 for males and 60.1 for females; and the percentage widowed 4.8 and 10.8, respectively. The percentages of those reported as divorced, 0.6 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 12.8 per cent of the females from 15 to 19 years of age are married, as compared with 1.2 per cent of the males, and 51.7 per cent of the females from 20 to 24 years are married, as compared with 25.4 per cent of the males. In the next age group, 25 to 34 years, the difference in the percentage—76.1 for females and 64.9 for males—is not so great, while in the age group 35 to 44 the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages married among those 15 years of age and over are as follows: Foreign-born whites, 64.2 for males and 62.3 for females; native whites of native parentage, 56.7 and 61.3, respectively; native whites of foreign or mixed parentage, 54.3 and 56.3; negroes, 51.4 and 54.9.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Missouri is 677,196, and the total number of families 749,812, there being 110.7 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 4.9, and the average number per family, 4.4.
